HRONoya – Saving the soul of the world through understanding TIME...

The human perception of time is closely related to birth and death. Throughout ages, civilizations had struggled to explain reality through cycles of celestial bodies. Humans have created numerous calendars and calculate ages on religious basis still. The modern times are synchronized to the Gregorian, Julian or Jewish calendars put together by religious authority. Thus our perception of time is not just inherent in religion, but localized to the cycles of our planet, Sun and Moon motion and revolution. The obscured Solar calendar of ancient pagans surfaces as the modern Christian calendar in which celestial events are mystified in religious ceremonies not understood by the common man.

Hronoya is a prophecy for the new mankind, opening the door to global understanding of the importance of time cycles consciousness, and the adoption of the new scientific thought on TIME – THE NEW SCIENCE OF TIME.

The continuity of TIME and SPACE is poorly understood. Measuring devices and technology, created and adopted to our sensory perception are further limiting mankind's ability to follow it's galactic purpose. In fact, scientific "progress" is actually pushing this understanding to a dead end. Human genetically inherited abilities to perceive eternity is being destroyed by focus on sensory fulfillment and synchronization of body cycles to destructive frequencies. The typical human work day is blinding

consciousness and numbing the fine tuning of the brain, making it impossible for a common man to experience frequencies beyond local. The irrational exuberance and destructive consumption of resources had already written a new cycle of mankind. On the ruins of today a new human race will find a cosmic way.

When was the beginning of time ?
Is this universe in perpetual motion ?

Hronoya is leading metaphysics to become new physics. Solution to slavery to unnatural cycles of living is understanding the fabric of time and it's relation to matter and space. The electromagnetic spectrum is perceived as SPACE and TIME is perceived as vibration in the electromagnetic spectrum. The perceived cosmos is electrical in nature. It constitutes an infinite series of resonant LC circuits (inductive/capacitive), where MASS is perceived as stored out of TIME (potential difference) owning it's existential frequency.

The key to understanding of this concept is shown to us as the mechanism of Earth's magnetic field-Earth's rotation and the Sun-Earth connection through the breath of the Solar wind. The soul of the world (Anima Mundi) perceives TIME through interaction of the Solar wind and the Earth's magnetic reconnection . This is the point of unity of the opposites in Earth's dipole magnetosphere. Thus the Earth's breathing of the Solar particles induces MASS in our planetary capacitor. HRONOYA is to unify electricity, magnetism and gravity in the point of magnetic reconnection of a MASS VEHICLE IN PERPETUAL ROTATION.

The NOYA prophecy describes the mechanism of TIME MIRRORING, an apparatus to function as a resonator of the Earth's magnetic reconnection (the Anima Mundi). TIME MIRRORS will be used by humans to create rifts in TIME/SPACE fabric. *The TIME MIRRORS will change human perception of energy as consumption of time rather than mass.*

PLANETARY ASCENSION FINAL SYNERGY THE ROSE OF THE WORLD NOOSPHERE

Boris Petrovic

"Graal" reflects a journey through culture, religion and science interacting as materializing symbols. It stands as a decryption of the horizon between physical and spritual existence towards final unity of physics and metaphysics. the seed of cosmic voyage and consciousness expansion of mankind. Depicted with inventions of NIKOLA TESLA, revealing the deepest secrets of the legacy of this extra-terrestrial spirit. It's essence is in physical evidence of the harmony of existence, creation of the almighty.

Holy Grail as a placenta of all-expanding time-spiral and the birth in spirit of new mankind on planet Earth, an event written about in all world religions and scriptures from the beginning of words, as blood of the collective being, as the food of human spirit. It is a road, beginning with initiation of consciousness through travelling to a Black Hole, the neverending road to pre-beginning, the end of past and present. It's task is collapse of 3-dimensional existence, opening the door to Heavenly Jerusalem, through the knowledge and use of blood-flow of the Solar system, magnetic fields of planets and the solar wind. Phenomenon of Ascension, explained as contraction of space and time of microcosmos, made by the human hand with the guidance of higher agents, made through will of mankind towards opening the holographic memory of creation, using gravitational disturbances in Earth's orbit, and for the glory of the timeless kingdom.

ASCENSION APPARATUS FUNCTIONS:

- induce images in brains remotely
- control brain functions
- control nerve-system functions
- induce lower frequency function of brain
- increase auric field strength
- collective consciousness tuner
