April 2, 2008 Albuquerque, New Mexico - Continuing "Blue Planet Project" with Pages 86 through 95.

ALIEN ABDUCTIONS

"The Monitors": Abductions - In the fifties, the EBEs, (Greys) began taking large numbers of humans for experiments. By the sixties, the rate was speeded up and they began getting careless. By the seventies, their true colors were very obvious, but the special group of the U.S. Government still kept covering up for them. By the eighties, the Government realized that it was too late and there was no defense against the Greys. So programs, (media, sine, TV, comics, commercials, books, magazines, cartoons, etc.), were enacted to prepare the public for open contact with non-human Alien beings. Now at the beginning of the 90's, (1991) these programs are continuing, and working well too.

The Greys and the reptoids are in league with each other, but their relationship is in a state of tension. The Greys only know the Nordics and the Reptilian Race as their Enemy, (don't confuse the difference between the Reptilian Race and the Reptoids or Reptiloids, because they are completely different races). We will talk more about the Reptilian Race later.

Some forces in the Government, want the public to be aware of what is happening, while other forces, (collaborators) want to continue making what ever deals necessary for an elite few to survive the coming conflicts.

The future could bring a fascist "New World Order" or a transformation of human consciousness, (awareness). The struggle is "NOW", when any active assistance is needed. **PREPARE ! WE MUST PRESERVE HUMANITY ON EARTH !**

The Case For Alien Abductions - GREY types and some NORDICs are on the top of an Alien Force who are bent on abducting millions of people (along our History) against their will, subjecting them to intense medical probing and committing other invasive acts. These determined Alien species are here, using Earth as a gigantic Breeding Ground. Their accumulated data show's that we're well past the phase where mythic or academic explanations alone will suffice.

Up from the strange, chaotic depths of abduction lore packed into a growing research files and journals, a central theme is emerging. The bottom line evidence of certain Aliens methodical, ultra-intimate program with Earthlings refutes the cosmic altruism found in traditional contactee literature, and counters the New Age trend of unrealistic idealism that concentrates exclusively on benevolent, spiritual motivations of presumed ET visitations. Scientists are beginning work on the Alien front, even the term "Extra-Terrestrial" stretches the data far beyond its reasonable limits. This unknown agency exhibiting strictly cold and clinical attitudes toward human beings is unquestionably "Alien"; it's certainly been witnessed often enough in conjunction with UFOs or UFO occupants. But even lengthy witness accounts that go into great detail about this or that Alien home planet or star cluster fail to factor out the elements of wishful thinking, deception and disinformation to the field of study. The

potential for misleading data attaches itself to abduction research as readily as memories of blindingly bright lights and "missing time" recur as acknowledgements of the experiment itself.

The bottom line cannot be discerned beyond the facts at hand. Researchers admit to being stuck in the very earliest stages of divisiveness and confusion, more than anyone else. The abductees themselves have to feel the pain-terrifying literal pain that comes from being at the mercy of an Alien Force whose bottom line agenda largely ignores the fundamentals of human dignity and well being. But the Aliens do fully comprehend and seem to manipulate the requirements of organic reproductive creation. In this, they are much like us. We are dealing in a realm that overrides long standing cultural habits of thought and behavior. All we have to work with are the reports that have been allowed to break through the rigid veil that hides UFO information. The bottom line is babies !!! Time after time, abductees recall the same sequence of events and observations, their mechanisms of conscious control softened under hypnosis. Many come in "Clean", that is, with little or no previous interest in UFOs and having never heard of or much less read the several books that are introducing the topic to the masses: INTRUDER AND COMMUNION.

The proscribed order of abduction events reveals an industrial sized operation with across the board demographics. People of all races, most ages and both sexes have had the experience. It's fairly obvious, the researchers maintain, the manufacture of hybrid babies dominates the Alien Agenda. It's very extremely structured; they may do a "Million" different things, but they're really interested in one thing alone.

The generic sequence of events as recorded and documented, is as follows:

- Examination
- Egg Harvesting or Sperm Sampling
- Baby Presentations (Only for Females, rare for Males)
- Machine Examinations
- Media Presentations of Idyllic Environments. The abduction sequence is not exact in every instance, but enough leading indicators must be present to qualify the case as one deserving further investigation.
- Capture
- Examination
- Conference
- Tour
- Other Worldly Journeys
- Theophany - The delivery of some sort of quasi-religious message or experience.
- Return
- Aftermath

This hasn't happened in that many cases, but still deserves particular mention at the moment. A significant number of abductees tend to retain special, almost spiritual feelings about their experiences, even if they were treated roughly or hurt. Also, recent investigative efforts are hinting that various sources in the intelligence community exhibit an odd preoccupation with the religious angle. These sources claim they can furnish an "inside track" to greater levels of truth about the UFO Phenomenon, and some investigators consider them trustworthy. They're inexplicable, "Fascinated" with religious side of the things. For some "nasty Alien Races" religion means the better way of mass manipulation and psychologic/sociologic control that they can get, and it works very well!

Researchers feel they are getting closer to having more definitive answers about abductions. A body of evidence that once emphasized matching details, lie-detection and the relative psychology of witnesses is giving way to one yardstick that never fails to command scientific respect. Similarities in form and content are important to know, but ultimate answers demand exterior evidence to bridge the gap between report and reality. After a close encounter of the 2nd Kind. We have documented the physical and chemical evidence such as soil samples and performed full analysis on these samples. The affected soil was packed in hard, desiccated chunks. To duplicate the effects, analysts had to heat normal soil at 800 degrees Fahrenheit for six (6) hours. This is one kind of physical evidence. Body scars and other medical trauma left in the wake of Alien examinations are perhaps the most incontrovertible evidence we found available. But other developments add more fully to the case for Alien reality. One example is an examination of stained clothing retrieved from an abductee just after her experience. The clothing awaits spectrographic analysis. The results of this analysis can tell us what kind of residual stains can appear, this again is additional physical evidence.

If large numbers of doctors in conventional gynecological practice were to be exposed to abduction data, a whole new sub-specialty would be inevitable. Many women abductees indicate that the Aliens tampered with their reproductive organs, if not actually committing a form of technological RAPE. Some women abductees are plagued with stark memories of strange wispy haired offspring whose presence sometimes evokes revulsion and the paradoxical feeling, "That's MY CHILD".

Additionally, we have to talk about the disappearing pregnancies. Abductees as far removed from one another as Brazil to New Hampshire tell nearly identical stories of pregnancies that suddenly appear and disappear and, later, reveal memories of repeated meetings with small, not-quite human infants they are asked to hold or touch.

One theory holds that the Aliens are attempting to learn by proxy the skills of nurturing to aid in the replenishment of their race. I think it's purely physiological. In some way we don't understand the baby is aided and/or helped by the physical touch. One of the abductees said she felt like a "Human Battery Charger". Elaborate rituals that present babies to parents and attempt to institute some sort of ongoing parent-to-child relationships have been documented, along with descriptions of high-tech nurseries and what looks like unusual incubation apparatuses.

The realm of UFOs is a place where paradox is the norm. It's assumed the Aliens use technology that far outpaces what we have on Earth, yet some of their methods seem low-tech by comparison. According to some data collected about abductions, the Aliens, like humans, have to confront the "World of E.r.r.o.r." in their experiments. For many years, the "World of E.r.r.o.r." appeared primarily as a crashed saucer, recovered pieces, and occupants..... what we're finding in the abduction phenomenon is that the factor of error is quite different. What it boils down to now is someone "sneezing out" something, or an odd metallic object in one's body that no one can make heads nor tails of. Several people have in fact sneezed out objects which may be Alien implants, through so far most of the objects have been lost or thrown away, but a few implants were recovered (which will be discussed later in this document).

The unfolding drama of abduction wouldn't be complete without a token note of "Big Brother" Government paranoia. Even earthly high tech includes sophisticated mind control techniques and the capabilities to project sights and sounds at a distance. Perhaps not probable, but it's possible that what most researchers consider an Alien orchestrated abduction sequence is actually a carefully scripted, electronically induced perception. That means big news to Earth:

If certain areas of the human brain can be remotely stimulated, then it is possible to develop a technology that broadcast over large territories, literally saturating the area with a flood of symbols.

Such a device would be a major tool or social change. The buzz that human witnesses often hear could be produced by microwave radiation, known to be in the arsenals of governments darker programs.

A mind control hypothesis could also explain the relative lack of physical evidence, through only an irrational stretch of the imagination might link mind control techniques with what evidence has been documented, i.e. physical traces, unusual metal garments and scarring. Worth noting, however, is the fact that some researchers pursuing this trail of investigation, have been summarily and sometimes harshly thrown off. Sporadic accounts of humans assisting with abductions add a chilling note. What we inevitably face, even with the growing evidence, is a mountain of unanswered questions. If and when the mainstream quits denying the presence of UFOs, a well supported program of tactical research may ensue. Until then, abduction remains a mystery and the abductees the outsiders whose physical and emotional well being hinges on its solution.

The data we have about abductions, as derived by conversations with the abductees, that during the abduction process all abductees were scanned with a very sensitive and powerful mental probe which retrieved all personal and private data (name, address, age, profession, psychological pattern, etc...) from the abductees and was readily available to the Aliens for their data bank. Just a few of these names and addresses go to our government per the Alien/Government agreement. During the

process of abduction a directional subliminal mental command, kept away any other non-interesting witnesses around the area of the Alien craft.

After an abduction occurs, and if we can maintain synchronicity of finding the abductees within 12-24 hours after the abduction, (really not an easy job), we recommend (in the case of a female abduction) a complete Gynecological procedure common to abductions.

In succeeding generations of family exposure to recurrent abductions, we are observing areas of the human body that are consistently and quite visibly affected. This evidence is related to the skin (dermatology) and muscles (musculo-skeletal system). During their experiences, many abductees and/or witnesses will feel a tingling, prickling, or static electric shock type of paresthesia sensation over the skin, followed by paralysis (involving the musculo-skeletal system) of the entire body, with the exception of an abductees heart and lungs where minor or no effects may be found.

Scar's - The body marks may remain permanently or become transitory in nature over a short duration, healing or disappearing all together. In dealing with the skin we find the following evidence:

- A thin, straight, hairline cut, linear, and about 1 to 3 inches in length.
- A circular or scoop like depression, about one eighth to three quarters of an inch in diameter and maybe as much as a quarter of an inch deep.

Rashes - Rashes are seen on the body, most appearing on the upper thorax (chest) area and lower extremities (thighs and legs). Many are geometrical in shape, triangular or circular. Other rashes, similar to chronic inflammations such as localized psoriasis, may be found on other body areas. First and second degree burns have been sustained in a number of cases and in some cases questionable tumors (Lipomas) have been noticed just beneath the skin.

The Most Common Areas Examined by the Aliens - Other medically determined patterns of consistency are as follows:

- The nasal cavity
- Ears
- Eyes
- Genitalia
- The umbilical (naval) Region on Females only

These areas appear to be the physical areas of greatest interest to the abducting Aliens. Many abductees have described a thin probe with a tiny ball on its end being inserted into each nostril, usually on the right side. The abductees are able to hear a crushing type sound as the bone in this area is apparently being penetrated. We believe this is when they insert a device for tracking and

communicating with the abductee in the future is inserted. Many abductees will have nosebleeds following these examinations.

AS A PRECAUTIONARY NOTE: We recommend that known or suspected abductees, who are parents, watch their children for any evidence of recurrent nose bleeds that can't be explained. I recommend immediately taking the child to a pediatrician to discover the nature of the nosebleeds.

Diagram of Female Areas Examined

91

Note: These are just a few of the locations, shapes, and types of Marks left by an abduction.

92

Many researchers believe that the Alien technology is being used to insert an implant (we talk about implants in other parts of this document) into this area for future tracking of the individual. It is interesting to note that many of the individuals subjected to nasal probing now have a future history of chronic sinusitis.

Documented evidence has also shown that some abductees have been probed in their eyes and ears with a similar instrument. With eyes being involved, abductees may experience temporary blindness, blurred vision, swollen, watery and painful eyes (photophobia), acute conjunctivitis (red and irritated, inflamed eyes that is called "Pink Eye" in lay terms). There's also some questionable history of these individuals developing cataracts.

Scars have been observed on the calf (including just over the tibia, or shin bone), thigh, hip, shoulder, knee, spinal column and on the right sides of the back and forehead.

Biological Specimens, Samples Usually Taken from Abductees and/or Witnesses: Evidence indicates that Aliens have taken blood, oocytes (ova) from females and spermatozoa from males, and tissue scrapings from their subjects ears, eyes, noses, calf's, thighs and hips, when abductees and/or witnesses are asleep or possibly under some form of Alien anesthetic.

There is also some circumstantial evidence to suggest that specimens might have been taken from the following; saliva, aqueous/vitreous humor (eye fluids), cerebrospinal fluid, urine, stool, hair and nails.

We feel that all abductees are given some type of preparation prior to their examinations. Some witnesses have reported receiving "Oral Liquid" medication, others an application of a liquid solution similar to a pre-operative "prep" over various parts of their bodies; some report a tranquilizing effect "telepathically" transmitted from the acting Alien examiner, and/or application of an instrument to the head which renders deep relaxation or unconsciousness.

Next we will outline that what we think are the three (3) stages of examinations which abductees are subjected to (through some type of pre-operative anesthesia):

First Stage - Pre-operative Abductees are subjected to some type of twilight sleep state, where they're in a definite trance or daze

This twilight sleep state could be induced by several different things, from the liquid application over the body, a specific conscious suggestions by the Aliens, the Aliens using some form of our hormones or enzymes to stimulate a neuro-chemical response, or some type of yet unknown technology.

One odd note, in connection with this stage, that prompts a lot of questions, is why is it that so few abductees remember removing their clothes? Because during the process of "light sleep state" they receive a subliminal command to erase the more traumatic moments of the abduction. Some commands are so strong that just a few of the abductees are able to remember clearly their experiences, even when placed under hypnosis to remember.

Second Stage - Procedures Physical examinations take place; such as probing, insertion, exploration of the body, taking of biopsies, blood or skin samples.

During this phase, the abductees may be semi-conscious as the procedures are carried out. Some actually experience pain. Despite objections, the Aliens appear to be indifferent to their victim's pain and suffering; on the other hand, some abductees at this stage are given heavier sedation to quiet their fears and apprehension and do not recall any pain with these procedures.

Third Stage - Post Operative Afterwards, the abductees and/or witnesses say their bodies feel sore or exhausted as if having been involved in strenuous activity; some explain that it feels they've been tossed around or "hit by a Mack Truck".

This is similar to the known effects of "Curare" a drug originating in South America that induces therapeutic muscular paralysis. There are specific blood enzyme studies, that if performed within 12-24 hours of exposure, can be used to detect any abnormalities of muscular activity.

Several documented physical traces of the abductee experience correlate fairly well with some of our recognized medical procedures. Most outstanding is one called "Laparoscopy", which is a cylindrical, tube like instrument with special optic attachments are placed through a females umbilical (naval) region for exploration of female organs. With this particular instrument, a physician is able to observe all female organs to determine if any abnormalities are present, as well as obtain OVA-EGGS from the ovaries. Most women abductees have felt they were being "blown up" inside, feeling tremendous pressures in the lower abdomen and discomfort in the vaginal area. During the Laparoscopy procedure, approximately two liters of carbon dioxide is instilled into the abdominal cavity. This causes distension of the abdomen, thus allowing better visibility of female organs. A few women may have residual scarring from the long, needle like instruments placed through the umbilical area.

Pregnancy - In correlation with the Laparoscopy procedure is a new treatment for infertility called Gamete Intra-Fallopian Transfer (GIFT), which treats infertility by placing sperm and pocytes directly into the infertile womans fallopian tubes for in vivo fertilization. In contrast with In Vitro Fertilization (IVF), GIFT facilitates natural physiological processes to achieve pregnancy.

Male abductees report having a tube like device attached to the penis which causes ejaculation for sperm sampling; this is highly uncomfortable to the individual. Most have said they sustain transitory

small lesions that disappear shortly afterwards. Others claim to have experienced direct sexual intercourse with an Alien Hybrid Female, ostensibly for the purpose of sperm retrieval as well.

A substantial amount of evidence has been accumulated that female abductees undergo gynecological insemination. These events have resulted in pregnancies, most documented by a positive pregnancy test by gynecologists. In cases of spotting or bleeding with these pregnancies, the physician normally performs a pelvic Ultra Sound scan (Ultrasound test to check pregnancy within the uterus) to rule out a threatened miscarriage or missed abortion (failure of the pregnancy to grow). The test can detect a pregnancy as early as five (5) weeks. Thus, pregnancy can be confirmed with two different gynecological tests. It should be noted that the government uses the abductees normal doctors to collect most of above and following data, without the patient knowing anything, and in most cases the doctors knowing very little, and threatened that if they ever talk, they will have the licenses revoked "permanently".

In cases we have seen, this is followed up by a subsequent Alien abduction, usually when the pregnancy is approximately 8 to 10 weeks along. During this time, there is a retrieval and/or removal of the pregnancy by the Aliens. The female may or may not experience spotting or bleeding during this time. What's baffling is how such a pregnancy can be removed intact, without causing death or injury to the extracted embryo by the Aliens.

In order for a particular to continue, several methods would have to be available immediately to sustain life in the extracted embryo. We suspect that some type of simulated intrauterine growth incubator is used to maintain the pregnancy; or perhaps an Alien Hybrid Female is used, whose role is to act as a surrogate type mother. Techniques for re-implanting the embryo are very difficult for our medical technologies of today.

Several alternative combinations can be speculated with the artificial insemination of female abductees:

- A. Alien sperm plus female eggs
- B. Male sperm plus female eggs, (in this case the Aliens choose a special type of Male).
- C. Male Hybrid sperm, (combination of both A and B) plus female eggs.

NOTE: Female human eggs are apparently needed in all cases.

- **Hybridization** - They claim that RH O- blood is the proof of hybridization and our own science tends to bear out their claim.
- We know that this group of Aliens has a tendency to lie. Since this is a "device" (referred to above) is of their invention, they are probably able to manipulate it just like Hollywood technicians manipulate equipment to produce the "Special Effects" or trick hologram photography.
