Part 1: Windmill Hill Pattern Near Ancient Avebury Came in Rain

© 2008 by Linda Moulton Howe

Rain was heavy in Wiltshire County, England, even flooding roads, the first week of August 2009. But at Windmill Hill near Avebury Trusloe, a 350-foot-diameter pattern of circles on rings with complex dumbbells in the center was reported on August 6. Aerial image © 2009 by Frank Laumen, VisibleSigns.de. More information and images: Cropcircleconnector.com.

Earthfiles, news category.

August 12, 2009 Albuquerque, New Mexico - I returned from England today with my photographs of the 350-foot-diameter formation at Windmill Hill near Avebury Trusloe in Wiltshire County. There was heavy rain in Wiltshire through nearly every day and night of late July and the first week of August. British newspapers reported that the unrelenting rain was delaying crop harvests in Wiltshire, Devon and other regions of England.

All day and night of August 5 to 6, there had been rain in Wiltshire, so I was surprised when Charles Mallett, Director of the Silent Circle Research Centre in Compton Bassett, told me there was a report of a new formation at Windmill Hill. I took the following images that August 6 morning when it rained so much I struggled to keep the camera from getting too wet between shots, worried that it might stop working in all the moisture.

The next day on August 7, 2009, Charles Mallett took his 20-foot-pole and camera to the Windmill Hill formation when the sun finally came out for awhile. Those photos are in Part 2 of this Earthfiles report.

Rainy Morning of August 6, 2009

All the Circles On Thin Orbital Lines Had Different Centers

“Chaos” of This Circle Actually Cross-Hatched “Order”

Steam rising from warm ground in above and below images.

One Circle Seems Unconnected to Orbital Lines, But Where Is It in Aerials?

Where is the connecting thin, orbital line to this circle at least twelve feet from where I stood on an orbital line to take this photograph the morning of August 6, 2009, soon after the large Windmill Hill formation was first reported?

Continued in **Part 2.**
