Yeti in Tatra Mountains, Poland?

© 2009 by Linda Moulton Howe

*"I saw this huge, ape-like form hiding behind the rocks.
When I saw it, it was like being struck by a thunderbolt."*

- Piotr Kowalski, Warsaw, Poland, hiker

Tatra Mountains in southern Poland (red circle). Highest peak is Rysy at 2,499 meters (8,190 feet).

Austrian Times headlined: “Polish Yeti Caught On Film.”

Monday, 14 September 2009, *Austrian Times*

Yeti (Bigfoot, Sasquatch) experts are heading to Poland after a local Austrian man filmed a “monstrous, hairy creature” while on holiday in the Tatra mountains. There have been rumours of a Polish Yeti in the area for centuries, but this is the first time one of the strange creatures has been captured on film.

Piotr Kowalski, 27, from Warsaw, Poland, was on a walking holiday in the Tatra mountains in Poland, when he saw a mountain goat on one of the slopes. As he started filming, his attention was suddenly grabbed by the Yeti creature emerging from behind some rocks.

“I saw this huge, ape-like form hiding behind the rocks. When I saw it, it was like being struck by a thunderbolt,” Kowalski told the daily Superexpress. “Coming from Warsaw, I never really believed the local stories of a wild mountain ape-man roaming the slopes. But, now I do.”

Frames, cropped and enlarged, from Piotr Kowalski film taken in Tatra Mountains of southern Poland in September 2009. Images reprinted in *Austrian Times*.

The film has been handed over for examination to the Nautilus Foundation, which deals with unexplained phenomena.

“The film clearly shows ‘something’ that moves on two legs and is bigger than a normal man,” says Foundation President Robert Bernatowicz. “But because the camera shakes so much, it is difficult to say what it is exactly. We need to go to the site and see what traces, if any, were left.”
