Aldebaran

NASA sent a message to the people of Aldebaran, and another one via Pioneer 10.

Definition:

Also called Ashtari, and Alpha Tauri, the planet of the Anunnaki. It is the brightest star in the Hyades; a giant red star in the constellation of Taurus; one of the 15 brightest stars with a visual magnitude of 0.85. Its diameter is 44 times that of the Sun.

It is accompanied by a very faint (13th magnitude) red star. Distance from Planet Earth: 65 light-years from Earth.

At one time, it was believed that the planet is a member of the Hyades cluster, but in fact Aldebaran is 85 light-years closer to Earth.

Aldebaran was nicknamed “The Follower” since it rises after the Pleiades cluster of stars. A NASA trusted scientist reported that in 1972, NASA sent a message to the people of Aldebaran, and another one via Pioneer 10.

Etymology:

The verb “Adbara” in Arabic means: He left, he moved away, he traveled, he walked away. And the correct meaning of the word Aldebaran is NOT “who he follows, or the follower” as tragically interpreted by Encyclopedia Britannica!

And I am puzzled and astonished by Britannica’s wrong definition of Aldebaran!!

Al Debaran or AlDaber means, “he who moved away, who left, who traveled”, and the Arabic verb is “Adbara”. Any person who speaks Arabic knows what “Adbara” means. The Arab nomads and early tribes in the Middle East, including the Persian Gulf and the Arab Peninsula have used the verbs “Idbir” and “Adbar” in their spoken dialect, and written language.

Aldebaran was mentioned in two important books:

- 1-The Anunnaki Ulema “Book of Ramadosh”,
- 2-The Arabic book “Ilmu Al Donia” (Science or Knowledge of the world”).

So, Aldebaran is Ash.Ta.Ri, the constellation of the Anunnaki, and the home of the extraterrestrials beings of lights Maria Orsic told us about.

Aldebaran (Ashtari) in ancient religions, mythology, astrology and esoteric studies:

- a-The Hindu masters called it Rohoni.
- b-The Phoenicians referred to it as the Eye of the Universe.
- c-To the ancient Persians, Aldebaran (Ashtari) was one of the four royal stars, and considered to be the star of wisdom and enlightenment.
- d-Aldebaran inaugurated the beginning of the Babylonian year, some 5,100 years ago.
- e-In the “Book of Chaldea”, Aldebaran was mentioned as the “guiding light -on the physical passage- toward the realms of the gods (Extraterrestrials).
- f-The ancient Habiru (Early Hebrews) called it the Eye of Il “El” (God).
- g-Eastern ascetics and numerous Buddhist monks called it the Star of the Buddha.
- h-The Rouhaniyiin called it the realm of the Mounawiriin (The Enlightened Ones).
- i-The early Akkadians called it the passage to heaven.
- j-Ashtari was known to the Arabs as Aldebaran.

The Aldebarans’ extraterrestrials

Keep in mind, that the Aldebaran’s aliens are not the Anunnaki, but an offspring of the Anunnaki, sharing the same galactic genes.

And yes, both descended on Phoenicia, Mesopotamia and the Anatolian plateau of Asia Minor (Turkey and Armenia) 450,000-460,000 B.C. The Aldebarans’ extraterrestrials who were part of the Anunnaki’s expedition to Earth, took part in establishing civilizations in the Near East, Middle East and Asia Minor.

Some of their colonies were:

- Eridu
- Uruk

- Nippur
- Nineveh
- Lagash
- Ur
- Umma
- Assur
- Ebla
- Saydoon (Sidon, Saida)
- Tyrakh (Tyre, Sour)
- Kadmosh
- Adonakh
- Ilayshim
- Markadash (Byblos to the Greeks, and Jbail to the Arabs)
- Baalbeck, where we find the legendary “Hajarat Al Houblah”
- Ugarit

These cities and their civilizations are mentioned in the ancient scriptures, slabs, and clay tablets of the Middle East, Near East, the Phoenician Cosmogony, the Sumero-Akkadian epics written in cuneiform, and the Bible.

Maria Orsic was right when she said that the Aldebaran’s people created civilizations in Mesopotamia (Sumeria, Babylon, Akkad, so on), and they came from Aldebaran (Ash.Ta.Ri, Alpha Tauri).

Some authors and well-known hosts of TV shows on aliens have claimed that Nibiru is the planet of the Anunnaki and the ancient alien gods, because the Sumerian tablets said so!

If this is the case, then Maria Orsic’s claims are wrong?

No! Maria was right, and they are wrong because the Sumerian epics never mentioned Nibiru as the home-planet of the Anunnaki; those people need -first- to learn Akkadian and Sumerian before they interpret epics written in languages they can’t read.

The Anunnaki-Ulema have revealed to us that some planets in our galaxy, as well as in Ashtari constellation are positioned on a 33.33 degree line which serves as “Ba’ab” (Gateway) to other galaxies and dimensions. This 33.33 degree line was mentioned by Maria Orsic.

Ashtari constellation has millions upon millions of stars and planets, and many of them are a physical stargate, the Anunnaki Ulema call “an opening on”

multiple universes and dimensions, including the astronomical bodies of the physical galaxies, and celestial ones that escape time and space, even before time was created, and since time existed as another dimension outside the landscape of the physical universe; this is incomprehensible to the human mind.

Maria Orsic description of Aldebaran (Ashtari).

Maria Orsic' description of Aldebaran is identical to the description of Ash.Ta.Ri, given by Anunnaki Sinhar Ambar Anati to American scientists and United States government officials and which we have on record. (Note: Published in a book I co-authored with the distinguished Dr. I. Anbel)

It is also similar to the description of other inhabitable planets in the Aldebaran constellation and other constellations given by the female alien Riyah to American generals, linguists and scientists in 1947.

The three extraterrestrials' descriptions can be compared in the "1947-1948 Aliens Transcripts", "Mouzakarar Sinhar Marduk", "Book of Ramadosh", and "Kitabu Ilmu Al Donia".

Astrological location of Aldebaran.

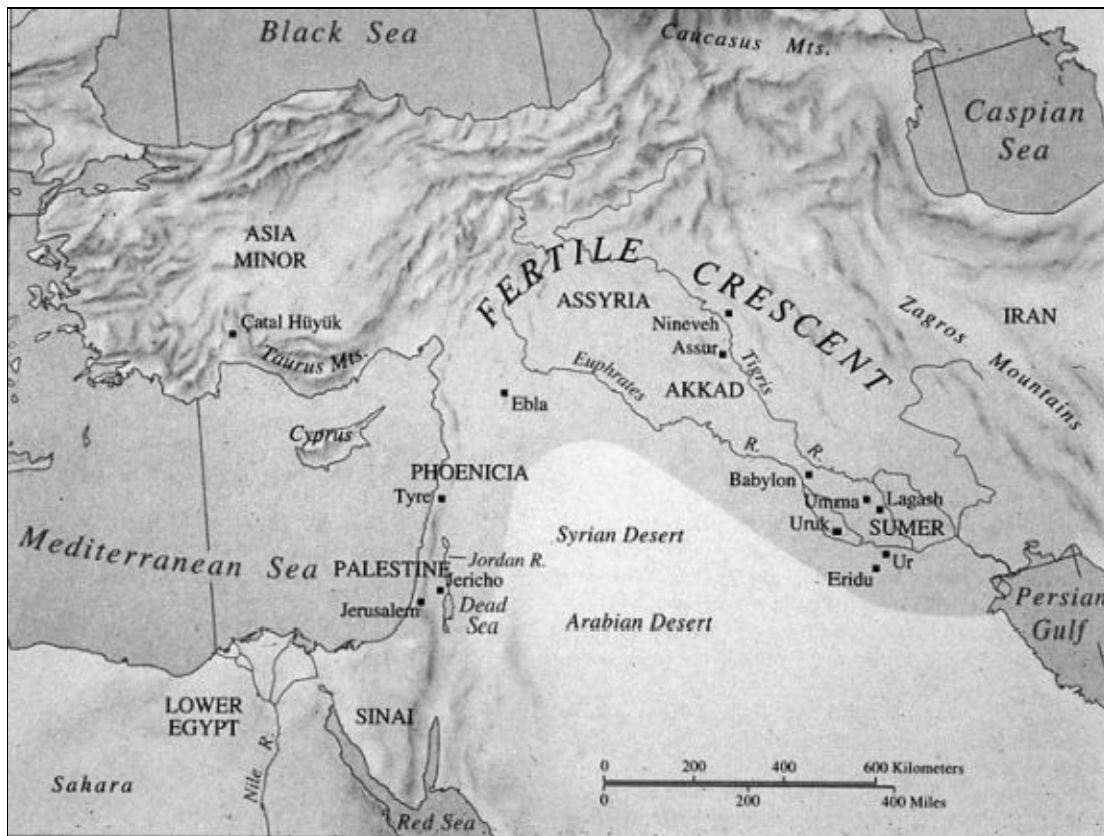

Aldebaran, from the files of NASA.

Aldebaran

Aldebaran is accompanied by Aldebaran B, (Alpha Tauri B, the home of the extraterrestrials who contacted Maria) a planet that contains water, lots of water, and it supports life.

Map of

Sumer, showing the location of the Anunnaki cities: Babylon, Lagash, Uruk, Ur and Eridu.

Days, moons and sun:

Days' calendar and moons around the inhabitable planets in Aldebaran: A day consists of forty-eight hours.

The sun rises around four o'clock in the morning, and the sunrise takes about two hours and twenty five minutes; the colors in the sky at that time are spectacular.

The sun shines for eighteen hours in the summer and for twelve hours in the winter; there are only two seasons on their planets.

The sun then takes two hours for sunsets. Ash.Ta.Ri (The planet of the Anunnaki) has four moons. All moons rise harmoniously one after the other, and line up in four different directions.

The home-planet of the Aldebaran's extraterrestrials has two moons and two planets rotating around it. The moons of each planet stay for about ten hours.

And when they fade away, they follow the same pattern, one after the other in the same synchronized manner.

Atmosphere and energy:

a-No pollution.

b-No smokes from factories.

c-No oil fuels.

d-Pure electromagnetic energy is used exclusively.

The term “electromagnetic” is not totally correct. But this is as close as we get to understand its properties.

Their energy consists of a blend of spatial neuro-plasma and subatomic molecules. And even these wordings are not correct because on planet earth, blending or fusing these elements and substances together contradict mainstream science.

Waters, lands and lakes:

There are plenty of canals, and so much water on their planet; about fifty/fifty to the land, the ratio is, but they have some wonderful lakes underground which are as blue as a sapphire.

*** *** ***

Adjacent planets and other extraterrestrials:

Inhabitants of adjacent planets vary sharply from one civilization to another, but all are highly advanced, and have one thing in common, which is very characteristic of their climate: An anti-pollution shield that protects their atmosphere.

On Earth, it is the Ozone.

Planets supporting life:

In the Aldebaran’s solar system, there are two small planets that support life, and are inhabited by people who resemble us.

They have evolved very slowly, and are considered by other galactic civilizations to be inferior, “even savages”, because they eat meat and fight.

At the far edge of their solar system there are four planets which are totally different from their habitat, because none has an atmosphere. They are cold, and sterile.

And their inhabitants don’t look like us physically; in fact their appearance will

scare the hell out of us, because some look like machines, while others like huge insects and reptilians.

Other civilizations are aware of their existence, but they avoid them because they are hostile and very aggressive; they belong to the forces of darkness.

Maria Orsic like Sinhar Anati talked about the Lyran system which consisted of 9 planets and 13 moons. The Lyrans, Aldebarans and Anunnaki are on very good terms.

Offspring of a higher race.

The Aldebaran's extraterrestrials are the offspring of a higher race (The Anunnaki) which visited Earth hundreds of thousands of years ago, and created the earliest civilizations on Earth. Some lived on Earth for thousands of years but eventually returned back to Aldebaran. Others got stuck on Earth and could not make it home. Consequently they lost their extraterrestrial genes, and began to look like humans, gradually.

Yet, they were very advanced and created wonders on Earth.

Some were killed by the Great Deluge, and those who survived, returned after a while to:

- Mount Hermon (Jabal Haramoun)
- Baalbeck
- Lake Van
- Urartu
- Dilmun (Ancient Bahrain)
- Hadramout (Yemen)
- Anatolia
- Mesopotamia
- Himalaya mountains
- Tibet
- Scandinavia
- And to scattered islands in the Mediterranean.

All are considered to be Aryans, even though the Anunnaki have black eyes and black hair, with the exception of the higher cast of the Anunnaki which has light black hair and blue eyes.

Effects on humans upon arrival to Aldebaran-Ashtari:

Orsic's dream was to visit the extraterrestrials of Aldebaran. And she asked them lots of questions about their habitats, lifestyle and whether she could live there with her Ladies of Vril. Here is a synopsis of what we already know about the physiological, psychological and emotional effects on humans upon arrival to Aldebaran-Ashtari.

Upon Arrival:

When a human being arrives to Ashtari-Aldebaran for the first time, he/she experiences new physiological, emotional and psychological effects, as well as psychosomatic reactions.

The extraterrestrials told Maria Orsic (Similar account by Anunnaki Sinhar Anati) that the very first thing she will see when she steps out of the spaceship could be described as a quantum jump into a world which looks like a sand storm on a completely gray planet.

At the very beginning, said the extraterrestrials to Maria Orsic, "you will feel horrible and becomes dizzy. It is the atmosphere of our planet that causes this. You need three days to adjust. "

The following is an excerpt from Anunnaki Sinhar Anati which perfectly illustrates the situation, Maria will be in, the moment she enters the world of her extraterrestrial friends:

Extraterrestrial adjustment.

The surgical operation.

The first thing the Aldebaran-Anunnaki extraterrestrials will do, is to take you to a bright room. A gentle person will show you the way to a bedroom.

This person exchanges a few words with you and directs you to a very comfortable bed. And you will appreciate that, because by then you will be extremely tired, and you will sleep instantly. The next day you will wake up, and the treatment of your sight begins.

A person dressed in lilac will show you to a room with a basin filled with aquamarine-tinted fluid.

This person will ask you to go in, relax, and think only about colors, nothing else, preferably about one specific color, and this person would come back in an hour or so. The bathtub makes you feel good. The bathtub is perfumed with some floral scent you will not recognize, but you will like a lot.

For a while nothing happens, but after a few minutes, all of a sudden a stream of lavender light fills the basin and then lifts up and surrounds you like a beautiful

web. At the same moment, and to your surprise, if on earth you had any muscular or joint pain, it will totally disappear. All these are part of adjusting your vision; they (Extraterrestrials) must cure all the weaknesses of the human body, genes, and all the possible diseases and sicknesses that you might have in the future, in order to readjust your sight.

On the second day, the same person (An extraterrestrial) leads you through a connecting corridor to a surgical room in another building. You will be introduced to a nurse, or a physician, who will ask you to lie down on a table.

A machine comes from the ceiling, shining a laser-like beam.

Scanning your brain.

The machine scans your brain, and the nurse will ask you to look at the screen on your right side to see how the cells in your brain would create new visual faculties.

This is absolutely amazing.

You could actually see how your brain works.

The nurse explains to you that many cells, millions of particles of your brains, were never used by you and now many of them would become yours to use.

After a short time, the nurse puts a soft but firm bandage around your eyes and a metallic band or a belt around your forehead.

The band or the belt readjusts the level of energy and reactivates part of your brain's cells. The band or the belt also develops a telepathic power in due time.

At a later day, you will be able to communicate telepathically with us. Pictures start to flow into your head and you don't know where they come from. Some are the faces of other beings you have never met in your life. It is a very strange feeling.

You see faces and other things, but you do not hear sounds or voices. And everything happens calmly without any mental or physical effort.

When the treatment is over, your vision becomes perfect.

And soon, you could go out and see the planet for the first time.

Outside, the air is pure, and the sky is full of rainbows of colors. You have never seen such colors in your entire life, because these colors do not exist on earth.

Some of the colors of the sky blend with the colors of the landscape, giving you the feeling that the ground is united with the sky.

Acquiring a ""surrounding vision.

Then, you realize that something very strange is happening to you; your vision is no longer limited to straight lines. Now, you can see, magically, to the left and to

the right, like a surrounding vision. And you start to see more and more things; absolutely stunning buildings glimmered under the brilliant sky, trees, bushes, and flowers everywhere and beautifully dressed, smiling people walking in the streets. How different from what you saw first, a gray planet with swirling sand in its atmosphere!

Immediate impression and reactions:

Those who landed on the Aldebaran-Ashtari constellation for the first time experienced something very unique; an optical problem, a psycho-somatic vision/sight anomaly, more precisely, the inability of seeing.

Temporarily they become totally blind.

This phenomenon and how to regain sight was described by Sinhar Ambar Anati.

Note: Anati is describing what happened to her upon her arrival to Ashtari and she is talking to her Anunnaki relatives.

In her own words:

“Why can’t I see anything outside?

It’s the atmosphere.

There is no pollution, no smoke, no oil fuels, since pure electromagnetic energy is all the Anunnaki use.

It is so bright, so clear, that it creates a strange effect on the human retina, which is accustomed to various/different conditions...

When I woke up, my treatment began.

Miriam (An Anunnaki female) took me to a little room where she showed me a basin filled with aquamarine-tinted fluid.

She asked me to go in, relax, and think only about colors, nothing else, preferably about one specific color. She would come back in an hour or so, she said, and the water will stay warm as long as I was in.

I climbed into the bath which felt wonderful and was fragrant with some floral scent I did not recognize. I closed my eyes and thought about the color lavender, beautiful, gentle soft kind of lavender.

For a while nothing happened, but after a few minutes, all of a sudden a stream of lavender light filled the basin and then lifted and surrounded me like a

beautiful web. To my surprise, at the same moment, a joint pain I developed on earth disappeared. It was in my ankle, which I have hurt a year ago while running, and it did not heal properly, giving me occasional pain.

I twisted it when I left the spaceship and stumbled, and it hurt when I woke up from my nap. Now it was perfectly well. Later they explained that as they adjust the vision, they must cure all the weaknesses of the human body, my genes, and all the possible disease and sicknesses that I might have in the future. Even at my young age I could feel the difference between the human condition and perfect health.

On the second day, Miriam led me through a connecting corridor to a surgical room in another building.

They have these immense corridors, connecting houses and buildings to each other, and they never lock any doors.

Such a trusting, simple lifestyle, such a pleasure.

She introduced me to a nurse, or physician, who asked me to lie down on a table. I did, and a machine came from the ceiling, shining a laser-like beam. Apparently, they scanned my brain, and the nurse told me to look at the screen on my right side and see how the cells in my brain would create new visual faculties.

This was utterly amazing.

I could actually see how the human brain worked!

The nurse explained that many cells, millions of particles of the brains, are never used by humans, and now many of them would become mine to use. After a short time, the nurse put a bandage around my eyes and a metallic band around my forehead. This was needed for readjusting the energy and reactivating part of the cells.

They told me that this will not only adjust my vision, but will develop a telepathic power in due time. Indeed, to my great delight and astonishment, at a later day I was able to communicate telepathically with the Anunnaki, at will.

When the treatment was completed, my vision was perfect, and Miriam told me that I could go out and see their world for the first time.”

Ethics and family:

Aldebaran and Ashtari extraterrestrials live in a world our human logic and mind can't understand. Although they (The extraterrestrials) do not practice any religion, their sense and understanding of ethics, justice, good and evil deeds,

and merits are well developed.

They see the universe, the development of the mind and a person's character quite differently from the way we do.

They take into a great consideration the consequences of an act, even a miniscule thought.

They don't have courts of law, trials, tribunals, prosecutors, judges, lawyers and corporal punishment, but they have established rules that govern behavior, merits, deeds, and social justice.

"Their families, parents, children, relatives, and members of their communities are guided by social ethics and a moral law, far superior to our laws and religions...they have families like us...they feel like us...they work together in a perfect harmony, using a collective awareness shared by all..." said Maria Orsic. (Note: This is exactly what Sinhar Anati said, and which I have published in one of my books on the Anunnaki.)

Worth mentioning here what Anunnaki Ulema Najani said on the subject: "The Anunnaki have families, fathers, mothers, and children too, and they follow familial hierarchy, and family morality rules as we do here on Earth..."

An Anunnaki Ulema said, "Unlike other extraterrestrial races and species that are not built around family structure and parental bonds, the Anunnaki live within their own families perimeter, and show feelings and emotional reactions as we do..."

He added, "The head of a living unit or a family is the father. However, the family is always placed under the direct guidance of a mother.

Anunnaki society is matriarchal."

In other words, women rule!

Extraterrestrial Karma, body's cells and mind:

The word "Karma" does not exist in their vocabulary, for they don't have the concept of reincarnation.

Even though, physical death does not exist in their world, as we understand death on earth, all reach a point when and where the last cell of energy in their bodies ceases to function, thus resulting in the deterioration of their cells.

"After the deterioration of their cells...after they have lived for hundreds of thousands of years, their physical body that they were currently using fades away, but their mind recreates itself as a new copy of the physical body,

because, each one of them has a multitude of copies of their body.

They can activate and reactivate the last fully functional and healthy cell of the Vril (In this context, by Vril, Maria Orsic meant the quasi-eternal cosmic energy of the self, including the universe), and reproduce it in a large quantity, and activate each newly created cell separately, thus recreating multiple copies of themselves, and restore them in a reversed eternal time storage.

On Aldebaran, I will never age, and my mind will grow healthier and wiser...”
said Maria Orsic.

Kitbana

The Aldebaran's Akashic library.

Learning from Adelbaran's Extraterrestrials and Anunnaki:

Maria Orsic said, "I am not afraid to go to Aldebaran, Jamara (Name of a planet rotating in their constellation) and Nimra (Another planet), for they (Extraterrestrials) told me that everything is going to be fine.

Heike was extremely concerned because we don't know their language and their habits. But they told me once we are there, they will re-construct our minds and bodies, and we will never suffer again or get sick.

Their world is peaceful and beautiful.

They will teach me many new things and I will learn about the greatest secrets in the universe...I will have access to their universal libraries (Kitbana) which contain the Akashic records of the universe.

I found Maria's statements mind-bending, because they mirror what exactly the Enlightened Anunnaki Ulema told us centuries ago. The Honorable Masters explained to us that the Anunnaki and Aldebaran Akashic Library is not a library in the traditional sense, because it contains no physical books on shelves.

Each one of them (Extraterrestrials) has access to the global Akashic Records through the Akashic libraries, which are located in every community.

One enters through a huge door that is never closed, day and night. It opens into a huge hall, seven hundred to one thousand meters in length, by five hundred meters in width.

The hall of Kitbana:

The hall is empty of any furniture, and is lit by windows that are placed very high, near the ceiling. The windows were designed in such a way that the shafts of light that enter through them are very sharply delineated and look like solid beams of light.

At night, the same effect is achieved by enormous spot lights placed near the windows.

The effect is incredibly effective. Extremely large billboards hang on each wall.

A pad which reads your mind.

On the floor in front of each billboard are hundreds of pads. When visitors enter the library, they approach the billboard, stand each on a pad, and think about their destination within the building.

The pad has the capacity to read minds, and as soon as it does so, it begins to move, and it slides right through the billboard, which is not really solid but is made of a form of energy, carrying the visitor with it.

A screen connected to the “Conduit”.

Cosmic information and codes.

Behind the billboard is the main hall of the Akashic Library, called Mad-Khal. The visitors find themselves in the presence of an immense screen, composed of a material not found on Earth.

The screen is hard to describe; it can be compared to a grid, with a multitude of matrices and vortices of data.

The screen is contacted through the Conduit which is located in the brain’s cells. The screen can read minds, and it knows right away what information the visitors seek. All what the visitors have to do is stand still in front of the screen, and the data will be displayed in sequences.

Of course, the data is not represented by lines, sentences, or paragraphs, but rather by codes.

Each code contains particular information related to an aspect of the subject. For example, if you would like to visit Iraq, 2,000 A.D., Iraq 300 B.C., or Iraq 2,008 B.C., all you have to do is to focus on these dates, and three codes will appear on the screen waiting for your command to open them up.

From this moment on, the Conduit located in your brain and the Screen are communicating in the most direct fashion. The three files (The nearest description of these files would be to call them digital, for the lack of the proper word) will open up. Each one will contain everything that had happened pertaining to that particular date in Iraq.

The Conduit will sort out, classify, and index the particular data for the part of the information the visitor is most interested in.

Then, the information will be stored automatically in the cells of the visitor’s brain, increasing the size of the depot of knowledge in the brain.

And because Anunnaki are connected to each other and to their community via the Conduit, the data recently absorbed is sent to other Anunnaki to share it, which is extremely beneficial, since if the data received from the screen is difficult to understand, the Anunnaki community called Jama, or an individual Anunnaki, will send, also automatically, the explanation needed.

This is quite similar to an online technical support on earth, but it is much more efficient since it functions brain-to-brain.

Each Anunnaki community have the same kind of center for these mirrors of knowledge which are the Akashic files. The complexity of the centers though, is not the same.

The Miraya and the codes:

Some of the Akashic Libraries include more perplexing and complicated instruments and tools, which are not readily available to other communities.

These tools include the monitor, which is also called mirror or Miraya in Ana'kh.

Each Miraya is under the direct control of a Sinhar (A leader), who serves as custodian and guardian.

It is very important to protect the privacy of every member of the community, because individuals could attempt to tap into the data of the Miraya and have access to the codes of the telepathic communication of others, thus enabling them to read the mind of community members, something that is considered highly unethical and absolutely must be avoided.

The screens, by the way, can expand according to the number of codes that the researcher is using. Seven to ten codes are normal. If more codes than that are opened, the screen is fragmented into seven different screens, which are only visible to the mind.

An amazing phenomenon occurs at this moment; time and space mingle together and become unified into one great continuum.

This enables the researcher to grasp all the information in a fraction of a second.

An added convenient aspect of the Akashic files is the ability of the researcher to access them in the complete privacy of the researcher's home or office, since part the files can be teleported there.

But since the private screen is not as complicated as the central one in the Central Library, no multiple screen will open up, only the original one.

Min-Zar: The cosmic audio antennae.

It is important to understand that the data received is not merely visual. There is much more to it than that. By the right side of the screen, there are metallic compartments as thin as parchment paper, which serve as a cosmic audio antennae, called Min-Zar.

These compartments search for, and bring back, any sound that occurred in history, in any era, and on any planet.

And this is just a minor part of it, because it brings additional sounds from other

dimensions, and para-galactic civilizations (Terrestrials and extraterrestrials). According to the extraterrestrials, every single sound or voice is never lost in the universe.

The voice is never lost, because it is energy and it stays in the perimeter of its sphere, call it for now, atmosphere, space, etc. The Anunnaki combined asset of the visual and audio systems provided by the screen, gives anybody the ability to learn languages afforded by the Akashic Library.

This applies to any language – past, present or future, and from any part of the universe.

The researcher can call up a shining globe of light that will swirl on the screen with enormous speed. As it rotates, the effect blends with an audio transmission that comes from the metallic compartments.

In an instant, any language will sink into the brain's cells. On the left side of the screen, there are several conic compartments that bring still images of certain important past events.

This mini-screen-display informs the researcher that these particular events cannot be altered.

In other words, the Anunnaki cannot go back in the past and change it.

The Anunnaki are forbidden to change or alter the events, or even just parts or segments of past events represented on the conic compartment, because these images represent events created by the Anunnaki themselves.

Reconstructing DNA.

This restriction works as a security device, an essential one. For example, a young Anunnaki cannot visit planet Earth sixty five thousand years ago, enter the genetic lab of the Anunnaki in Sumer or Phoenicia, and change the DNA and the genetic formula originally used by Sinhar Enki, or Sinhar Anu, to create the human race, or the seven prototypes of the human race created by Sinhar Inanna. Sinhar Inanna herself can go back and change it, but not for use on earth as we know it. She has to transpose it and transport it to another dimension, parallel to the original dimension where the event occurred.

This safeguard means that Sinhar Inanna cannot recreate a new race on our earth by sending us, the current living humans, sixty five thousand years ago back in time, remoulding us, and then bringing us back to the twenty first century as new specie, or a new race.

This would be unethical.

All she could do would be to recreate her own experiment in another dimension. For instance, Inanna can go back 2,000 years in time and space, reconstruct the DNA of Jesus Christ and create a new Jesus. But the new Jesus will not exist on

the map of year 1, or return to Bethlehem to be re-born again. He will be transported as a grown man to another dimension not very much different from the Palestine Jesus knew.

Before the extraterrestrials' screen in the hall of the Akashic Records, more options are available for research, and one of them is a sort of browsing. Inside the screen, there is a slit where the mind of the extraterrestrial can enter as a beam.

Opening Stargates.

This will open the "Ba'abs", or Stargates, to other worlds that the researcher is not even aware of, but appeared randomly as part of the discovery or exploration.

In each slit there is another Akashic file that belongs to other universes, worlds, dimensions, and civilizations, sometimes more advanced than the Aldebaran's people and Anunnaki themselves, where the researcher can either retrieve important information, and/or witness the creation of the future.

It is like going back in the future, because everything that exists in the present, or shall occur in the future, has already occurred in a distant past and needed time to surface and appear before the eyes of the extraterrestrials.

The term Akashic is herewith used because many of us are familiar with what it means and represents, and to a certain extent refers to the contents of historical events and thoughts recorded in "human history."

In the Aldebaran-Anunnaki context, it is the record of cosmic events that occurred in multiple galaxies.

The reason it is called the Akashic-Cosmic Library is because it has equipment that allows researcher to connect to the Akashic/Cosmic Records; the vast compendium of knowledge encoded in a non-physical plane of existence, in a substance that is called Akasha.

In Ana' kh, it is called Ab.Har, or simply Har.

Impregnation operation in Ashtari "Aldebaran":

Known as "An-Ista-Khan-na-reh" in Ana'kh.

The female Anunnaki goes into a very nice hospital-like place. Anunnaki physicians will help her to lie down on a table, much like one of the examination tables in any doctor's office on earth.

The attending physicians will be all females, very gentle and extremely skilled.

Using a special machine, they will beam a light right through the woman's body; the light will search for her ovaries. Nothing will probe, or hurt, or even annoy the body.

Once the light reaches the ovaries, it will activate one of the eggs, fertilize it, and have it move very smoothly into the uterus. The woman then becomes pregnant, and the fetus will begin to grow.

Anunnaki women have the egg removed by the light, placed in a special tube, and grow the baby in a machine. They don't have birth in the same sense humans do, but take the baby home after he or she is ready in the advanced incubator.

This impregnation operation is called "An-Ista-Khan-na-reh".

It is composed from the following words:

- 1-An'h=Creation; first; celestial.
- 2-Ista or Ishtah=Child; baby; first born.
- 3-Khan=hospital; operating room.
- 4-Na=Source; first breath; first nourishment.
- 5-Reh or Rah=Delivery; reception; relief.
