**MANLY P. HALL (1901-1990)** | a seeker and lover of wisdom—the very definition of a philosopher—he had the courage and raw energy to look for wisdom in places most men had long since forgotten or never knew existed. As the Philosophical Research Society's founder and first president, he began his career in an era when most Americans did not look toward other cultures and traditions without looking down. And yet, Manly P. Hall spoke and wrote extensively on the wisdom found in *all* ancient traditions, and the deep cross-cultural threads and many interconnected roots of modern religious expression. While neither guru nor saint (he made no claim of perfection, far from it), his work is exceedingly rare in its grand scope, detail and synthesis. He embraced the wisdom of every tradition and, with a fluid command of the obscure and complex contents of these traditions, worked to express their unifying truths. In his long career, spanning more than seventy years of dynamic public activity, Mr. Hall delivered over 8000 lectures in the United States and abroad, authored over 200 books, essays, and magazine articles, and left the world one of the finest libraries in the field, as well as a University that continues in his spirit of universal learning.

## THE WORK OF MANLY P. HALL

# AMERICA'S ORIGIN AND DESTINY

## AMERICA'S ASSIGNMENT WITH DESTINY

Adepts in the Western Esoteric Tradition, Part 5

The unfolding story of the esoteric traditions in the Western Hemisphere is revealed, beginning with the rites and mysteries of the Maya and Aztecs. Parallels are drawn between the miracles of the North American Indian medicine priests and wonder-workers of India. Also included:

an account of the Incas of Peru and their possible contact with Asia; the riddle of Columbus; the role of Francis Bacon in organizing the English settlements in America, and the contributions of the German mystics through the Pietists, Mennonites, Dunkers, and Quakers. The American Revolutionary period and important personalities of that time are examined, as are the Latin American patriots Simon Bolivar, Miguel Hidalgo, and Benito Juarez.

**\$10.95** | Paperback. 119pp. ISBN: 0-89314-502-5

## LIBERTY AT THE MILLENNIUM

Norris Hansell. Illustrations by Miro Salazar

Through the written and spoken words of our forbears, this work aims to provide a compact rendition of the central ideas in our founding documents. The eloquent works of the founders are presented without commentary. The book extends beyond the work done in Independence Hall by Jefferson, Penn, Hamilton, Adams and Madison, to include the words of those less known—Phillis Wheatley, Paul Cuffe and Hiawatha. The central idea in the founding of America was liberty, its indispensability for the

robust life of citizens, its need for protection by a government of special design. Looking ahead, the founders anticipated that Americans ever would need to guard their liberty because of its long history of fragility before the forces intrinsic to all governments.

## THE MAGIC FIRE

## THE SECRET DESTINY OF AMERICA

The fascinating story of how North America was colonized by Europe. Described by Francis Bacon as the "New Atlantis," it was seemingly set apart for

the great experiment of enlightened self-government long before the founding fathers envisioned the rise of the American Republic. Drawing upon often neglected fragments of history, this work presents evidence indicating that the seeds of democracy were planted one thousand years

before the beginning of the Christian Era, suggesting that America is not merely a political and industrial entity, but an "assignment of destiny."

## NEW FOR 2009!

### MYSTICISM OF COLONIAL AMERICA

This collection of essays details the early work of Johannes Kelpius (1673-1708), a German *Pietist* and mystic, William Penn (1644-1718), and others in Colonial America as they made a valiant effort to dedicate this world, this hemisphere, to the fulfillment of the prophecies of the ages. Transcendentalism has been described as a philosophical and religious democracy,

a part of our heritage that we ought not forget. Also discussed is the connection between American mysticism and Ancient Greek and Alexandrian classical philosophy as seen through the prism of early mystical Christianity.

### THE MOST HOLY TRINOSOPHIA OF THE COMTE DE ST. GERMAIN

Comte de St.-Germain. Introductory Material and Commentary by Manly P. Hall

The great Rosicrucian who termed himself the "Comte de St. Germain" is one of the most baffling personages in Western history. His activities are traceable for more than one hundred years between 1710 and 1822, leading Frederick the Great to refer to him as "the man who does not die." St. Germain

was a scholar, linguist, musician, painter, and an alchemist so profound legends reputed he could turn "base metals into gold." This unusual work was prepared for the instruction of St.-Germain's disciples in the cabalistic, hermetic, and alchemical mysteries. The original manuscript is housed in the *Bibliothèque de Troyes* in France.

# LEARNING TO LIVE BY LIVING TO LEARN

## LEARNING TO LIVE BY LIVING TO LEARN | The Natures of the Human Body

The first step in the study of the *Ancient Wisdom Teachings* is not the “quest for knowledge,” but the preparation of the self to “receive knowledge.” This is the first obstacle faced, where most truth-seekers make their first mistake. With their eyes turned toward the heavens, they rush ecstatically toward “illumination,” only to stumble, like Thales, “into the ditch of their own unpreparedness.” The desire for wisdom is in itself the most commendable of human qualities, but in too many cases this desire comes to nothing through ignorance and misunderstanding. We must not only earnestly and unselfishly desire truth, we must create within our own nature the ethical environment suitable for the reception of spiritual knowledge. Before it is possible to perceive clearly the mysteries of the inner life, one must develop the faculties for this perception.

This unique lecture pamphlet series explores the **FOUR NATURES** of the **HUMAN BODY**: the *physical*, the *vital*, the *emotional*, and the *mental*. These lectures are a compilation of Mr. Hall’s essays, articles and published works, exploring his personal beliefs about the connections between the inner life and the outer person. They are aimed at helping the reader gain an in-depth understanding of the *four natures* of the human being and the human body. All four aspects must work in harmony to enrich the inner life.

## NEOPLATONISM | Theology for Wanderers in the New Millennium

Transcribed by Clarke E. Johnston from the five-part audio series "DOCTRINES OF NEOPLATONISM," a series of lectures given by Manly P. Hall in 1983 to students interested in the ancient wisdom of the Neoplatonists. It seemed to have been one of his favorite subjects down through the years, he spoke and wrote about it frequently during his long career. The foreword to "LECTURES ON ANCIENT PHILOSOPHY" declared that the basis of his own personal philosophy *was* Neoplatonism. In the latter part of his life, Mr. Hall said that after years of study and reflection, he had come to believe that the doctrines of Neoplatonism had descended to us in a purer form than nearly any other philosophical system. This system seemed more suitable to the active, extroverted Western cultural mindset. He believed this was true because though it was as deep and thorough as any other approach to enlightenment, its precepts were more easily understood and their relative simplicity tended to impel an interested person to put them into practice by beginning to learn to live a more philosophic life.

### NEOPLATONISM | Book 1 Proclus on the Theology of Plato

What is the essential difference between the teachings of Plato and the New Platonism or Neoplatonism? Old ways were not felt sufficient to meet the neurosis of the dying classical dynasties. Neoplatonism is primarily

to be defined as a *motion* of Platonism toward theology. In other words, it is the rise of Platonism *as a religion*.

**\$5.95** | Pamphlet. 40pp. ISBN: 0-89314-860-1

### NEOPLATONISM | Book 3 Plotinus on the Beautiful

In the beginning, the Neoplatonists considered *Beauty* an alternative to the word "good." *Good* with a capital 'G' was the Neoplatonic equivalent of our word *God*, the object of the Soul's desire. All things in themselves naturally aspire to the Good. If this natural aspiration is thwarted or blocked an infirmity in the psychic life of the person will result..

### NEOPLATONISM | Book 2 Iamblicus on the Mysteries

Iamblicus was by no means the most brilliant of the Neoplatonists. But he handled everything with a peculiar, wonderful mystical reverence. He was never satisfied merely to approach things on an intellectual level. He had

to go beyond this. Therefore, his name is associated with one step or degree of the Neoplatonic Ladder of development, the *Ladder of the Soul*, rising from *opinion* through all the different degrees of *intellect* culminating at the upper end in *Theurgy*.

### NEOPLATONISM | Book 4 Porphyry on the Wanderings of Ulysses

The Neoplatonists found mysticism in all things, convinced of a common denominator in human knowledge. As early as the time of Plato an effort had been made to understand the inner meaning of the writings of Homer. The

philosophers of the Platonic and Neoplatonic schools favored the idea that Homer's blindness was symbolic. It indicated not his inability to see on the objective level, but that he had turned his sight inward to the contemplation of things normally invisible.

### NEOPLATONISM | Book 5 Julian on the Mother of the Gods

Descended of Constantine, and himself an Emperor of Rome, Julian was a philosopher and scholar of ability, but essentially in his own personal life, a mystic. His writings are colored by tremendous emotional intensity. He

had a great and sublime sense of the dignity of life and was not inclined to accept anything upon its literal value—he sought a deeper meaning. Thus with the fables of the *Great Mother*, Goddess of the Ephesians, Isis the Mother of the Mysteries, he sought to find this meaning.

## THE NEW CONSCIOUSNESS

Obadiah Harris

In this book, Obadiah Harris, PRS President, delineates the evolution of religion, philosophy and science, and how they integrate themselves into the process man should follow to develop further. Through

the illustration and interpretation of Eastern philosophies, and the psychological and spiritual dimensions of the Bible, new horizons for both the individual and societal achievement are opened. This is not simply a book for self-awareness—it is more. It is a universal, positive book about man's evolution—primitive to civilized has not been enough. Our world is more complex, there is not enough love, there is no lasting peace. Man must take another step and this book points the way.

*&c.&c., with an Introduction, in which the meaning of the fable is unfolded.*” Taylor’s extensive introduction deals with the mystery of the human soul, divine love, and human regeneration.
